

NFX-Datasheet

Component : CloseButton/ClosePicture

Version : 5.10 | NOF 2/3 ☐ NOF 4/5 ☒

Description : This component is used to insert a button or a picture into a page with which you can close the actual browser-window. The text you've inserted will appear on the Button or will be included in the picture. These components are available as a bundle.

<u>Properties</u>	<u>Description</u>
• Wizard :	Double-Click this property to open the wizard or choose the Wizard-Tab you want to see first.
• Text : (required for CloseButton)	Here you enter the text that is displayed on the button or on the picture. This property is required when using the CloseButton-component. It is optional for the ClosePicture component.
• Image : (required for ClosePicture)	Here you browse to the file which will be used. This property is only available in the ClosePicture component.
• Image Name : (optional)	Here you enter a name with which the image is referenced internally. If left empty a default name is used. This property is only available in the ClosePicture component.
• Alternative Text : (optional)	Here you enter the alternative text which will be displayed if the browser is not able to load the picture or the mouse is over the picture. This property is only available in the ClosePicture component.
• Use Custom-HTML :	Here you choose if the Custom-HTML entered in the Wizard is inserted when publishing or not.
