

NFX-Datasheet

Component : FilePublisher

Version : 5.10 | NOF 2/3 NOF 4/5

Description : This component is used to publish additional files with a project. These files must be located on the local system. Optionally, you can choose a directory relative to the Publish/Stage directory where the files will be published. This component can be placed anywhere on the page. It will not be visible on the page.

<u>Properties</u>	<u>Description</u>
• Wizard :	Double-Click this property to open the wizard or choose the Wizard-Tab you want to see first.
• Publish-Dir : (optional)	Here you enter the directory relative to the Publish/Stage directory where the files will be published. If left empty the files will be published directly to the Publish/Stage-root directory.
• Number of Files :	Here you set the number of files you want to publish with your page.
• File x : (optional)	Here you browse to one of the files you want to publish with your page.
