

NFX-Datasheet

Component : **StructureHistory**

Version : **5.00** **NOF 2/3**  **NOF 4/5** 

Description : This component inserts an history of last visited pages based on the structure of your NetObjects Fusion site into your pages. You can specify the seperators (images or text) between the shown pages and specify which pages you want to link. With this Component you have the absolute way to insert navigation into your pages.
This Component only works in NetObjects Fusion 3.x.

<u>Properties</u>	<u>Description</u>
• Direction :	Should the structue shown from top to bottom or from bottom to top in the hirarchy?
• Nr. of Levels :	How many levels should be displayed?
• Up to page : (optional)	When this property is empty, the hirarchy will be shown up to the Homepage. You can set any other page too – when this page exists in the history, the structure will not be shown higher.
• Display-Texts:	Which text should be used to display – the Nodename, page-title, button-text or banner-text
• Text before link : (optional)	Enter the text to show before the history here.
• Text after link : (optional)	Enter the text to show after the history here.
• Use as Seperator: (optional)	What you want to use as Seperator between the history-links? An Image or text?
• Seperator Text : (optional)	Enter the Seperator-Text here.
• Seperator Img.: (optional)	Set the Seperator-Image here.
• Seperator Align :	Set the alignment for the Seperator-Image here.
• Spaces around Seperator :	How many Spaces have to be inserted between the Seperator and the next link?
• Link pages? :	Do the shown pages be links?
• Link actual page: (optional)	Should the actual page be linked too?
• Use in Autoframes? :	With this property you choose if you want to link to Autoframe-pages. In this case and according to the entered link target some NOF-Autoframe-specific things will be generated.
• Link Target : (optional)	Here you enter the name for the frame or window where the resulting page will displayed.
